*****MESSAGE*****

The Ontario Standardbred Adoption Society is a charitable organization that assists in placing retired and non-competitive Standardbreds into pleasure homes. We have recently been contacted by _____. She has chosen to not keep this horse any longer. It is her hope to have this horse adopted out to a pleasure home through our program.

The OSAS has been given very basic information about this horse. It is our policy to contact the most recent vet on each horse entering our program to inquire about **any known reasons why this horse would not be suitable for pleasure riding or driving**. It is helpful for us to know any past injuries or illnesses that you may be aware of. Any other pertinent information you could share would also be helpful. Our horses need to be able to walk and trot without pain, during trail rides or other types of riding.

Please consider in your assessment:

Disposition to work around?

(Disposition is very important as most of our adoptive owners are first time horse owners).

Injuries that would prevent horse from jumping, barrel racing, carriage driving or being able to walk/trot without pain or lameness-

Vaccination date-

Deworming date-

Please contact me directly by phone or fax at your earliest convenience. If your policy requires permission by owner, please call them directly. Your assistance would be greatly appreciated.
